### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John D. DeLong on August 24, 2006.

The application has been amended as follows:

In the claims:

Claim 3 has been amended to read as follows:

3. (Currently Amended) A method of manufacturing a camouflaged tire, the method comprising:

applying a first thin colored layer of perforated elastomeric material onto the peripheral surface of an uncured tire assembly;

applying at least one second thin colored layer of perforated elastomeric material onto the peripheral surfaces of the first thin colored layer on the uncured tire assembly;

wherein the steps of applying the first thin colored layer and the at least one second thin colored layer further comprise stretching the layers to increase the perforations into enlarged openings, to create at least three distinct colors

wherein perforations form openings in the first layers to expose portions of the ~~tire~~ underlying surfaces to create ~~at least two~~ the distinct colors in a multicolored camouflage pattern.

Claims 22-24 have been canceled.

Summary of above-noted August 24, 2006 Interview: Agreement was reached on the changes noted above in order to place this application into condition for allowance. These changes were proposed by the examiner to clarify some ambiguities in claim 3 as amended created principally by the reference in line 9 to "at least three distinct colors" as compared to the reference in line 11 to "at least two distinct colors". The new "underlying surfaces" language came from paragraph [0022] (lines 9-10) in the specification. The "one" in line 7 was canceled as it seems unnecessary and was not used in line 3. The cancellation of new tire claims 22-24 was because these claims were considered to be distinct from the elected method claims for the same reasons advanced with respect to the previously presented tire claims, these thus being considered to be directed to non-elected claims with the election of the method.
